

ACCESSORIES

BAC Water (Bacteriostatic Water)

BAC Water – 10 ml per vial – 11 vials per box

FOR RESEARCH USE ONLY (RUO). NOT FOR HUMAN OR VETERINARY USE.

IDENTIFICATION

CHEMICAL NAME	Bacteriostatic Water (sterile water with benzyl alcohol preservative)
SYNONYMS / ALIASES	BAC water; bacteriostatic water for reconstitution; preserved sterile water
COMPOSITION	Sterile water for injection USP-grade base + 0.9% w/v benzyl alcohol as bacteriostatic preservative
CAS NUMBER (BENZYL ALCOHOL)	100-51-6
CAS NUMBER (WATER)	7732-18-5
SOURCE	Manufactured to USP / research-grade specifications; sterile-filtered into vials

PHYSICAL PROPERTIES

APPEARANCE	Clear, colorless aqueous solution
PH	Approximately 5.0-7.0
STERILITY	Sterile (filtered or terminally sterilized - confirm per batch COA)
CONTAINER	10 ml per vial, sealed glass vial, rubber-stoppered, aluminum crimp

STORAGE & HANDLING

STORAGE	Room temperature (20-25 C); protect from extreme heat
IN-USE STABILITY	Per benzyl alcohol preservative specification, multi-puncture vials are typically considered preserved for up to 28 days after first puncture
SUGGESTED USE	Reconstitution solvent for lyophilized peptide research preparations
SHELF LIFE (SEALED)	Typically 24 months at room temperature
STABILITY NOTES	Benzyl alcohol is the bacteriostatic agent; do not use beyond labelled in-use period. Inspect visually before each use - discard if cloudy, discolored, or showing particulate matter.

COMPOSITIONAL NOTES

Bacteriostatic water consists of two components: water for injection (highly purified, low-endotoxin sterile water) and benzyl alcohol at 0.9% weight / volume. Benzyl alcohol is an aromatic primary alcohol ($C_6H_5CH_2OH$) widely used as a preservative in injectable pharmaceutical and research-grade aqueous formulations because of its broad-spectrum bacteriostatic activity at low concentration. The 0.9% concentration is the long-established standard for multi-dose injectable water preparations.

COMPLIANCE DISCLAIMER

This product is sold by Aligned Aminos for laboratory research use only (RUO). It is provided as a reconstitution solvent for research preparations. It is not a drug, dietary supplement, food, cosmetic, or medical device, and is not intended for use in humans or animals. Note specifically: benzyl alcohol-preserved water is contraindicated for use in neonates and should not be used for any in vivo application. Purchasers represent that they are qualified researchers or laboratory professionals and assume full responsibility for compliance with all applicable laws and institutional review requirements.

Batch-specific identity, sterility, and benzyl alcohol concentration are documented in the Certificate of Analysis (COA) issued for the lot.
