

GROWTH & GH AXIS

# CJC-1295 without DAC

CJC-1295 without DAC – 5 mg per vial – 10 vials per box

FOR RESEARCH USE ONLY (RUO). NOT FOR HUMAN OR VETERINARY USE.

IDENTIFICATION

|                     |                                                                                                                |
|---------------------|----------------------------------------------------------------------------------------------------------------|
| CHEMICAL NAME       | CJC-1295 without DAC                                                                                           |
| SYNONYMS / ALIASES  | Modified GRF (1-29); Mod GRF 1-29; tetrasubstituted GHRH(1-29)                                                 |
| CAS NUMBER          | 863288-34-0                                                                                                    |
| MOLECULAR FORMULA   | C152H252N44O42                                                                                                 |
| MOLECULAR WEIGHT    | 3367.9 g/mol                                                                                                   |
| AMINO ACID SEQUENCE | YADAIFTQSYRKVLAQLSARKLLQDIMSR-NH2 (GHRH(1-29) with substitutions D-Ala2, Gln8, Ala15, Leu27; C-terminal amide) |
| SOURCE              | Synthetic (solid-phase peptide synthesis)                                                                      |

PHYSICAL PROPERTIES

|                      |                                                                    |
|----------------------|--------------------------------------------------------------------|
| APPEARANCE           | Lyophilized white to off-white powder                              |
| PURITY SPECIFICATION | >=99% by HPLC (confirm against batch COA)                          |
| CONTAINER            | 5 mg per vial, sealed glass vial, rubber-stoppered, aluminum crimp |

STORAGE & HANDLING

|                                      |                                                                                                                                                    |
|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| UNRECONSTITUTED STORAGE              | -20 C, protect from light and moisture                                                                                                             |
| RECONSTITUTED STORAGE                | 2-8 C, stable approximately 14 days in bacteriostatic water                                                                                        |
| SUGGESTED RECONSTITUTION SOLVENT     | Bacteriostatic water or sterile water (research use only)                                                                                          |
| SHELF LIFE (UNRECONSTITUTED, SEALED) | 24 months at -20 C                                                                                                                                 |
| STABILITY NOTES                      | Avoid repeated freeze-thaw cycles. The shorter half-life relative to the DAC variant reflects the absence of the albumin-binding maleimide linker. |

## STRUCTURAL NOTES

CJC-1295 without DAC, commonly termed Modified GRF (1-29), is a synthetic analog of the first 29 residues of growth-hormone-releasing hormone (GHRH). Four amino acid substitutions (D-Ala at position 2, Gln at 8, Ala at 15, and Leu at 27) increase resistance to dipeptidyl peptidase-4 cleavage and improve synthesis stability relative to native GHRH(1-29). Unlike the DAC variant, it lacks the drug-affinity-complex maleimidopropionic acid group; see the [[cjc-1295-dac]] datasheet for the albumin-binding version.

## COMPLIANCE DISCLAIMER

This product is sold by Aligned Aminos for laboratory research use only (RUO). It is not a drug, dietary supplement, food, cosmetic, or medical device. It has not been approved by the FDA for any therapeutic, diagnostic, or preventative use. It is not intended for use in humans or animals, and may not be administered, ingested, applied, or otherwise introduced into any living organism. Purchasers represent that they are qualified researchers or laboratory professionals and assume full responsibility for compliance with all applicable laws and institutional review requirements governing the handling of research chemicals.

Batch-specific identity and purity are documented in the Certificate of Analysis (COA) issued for the lot.
