

RECOVERY & REPAIR

TB-500 FRAG

TB-500 FRAG – 10 mg per vial – 10 vials per box

FOR RESEARCH USE ONLY (RUO). NOT FOR HUMAN OR VETERINARY USE.

IDENTIFICATION

CHEMICAL NAME	N-terminal acetylated thymosin beta-4 fragment 17-23
SYNONYMS / ALIASES	TB-500 fragment; TB4 (17-23); Ac-LKKTETQ
CAS NUMBER	885340-08-9
MOLECULAR FORMULA	C39H67N9O13
MOLECULAR WEIGHT	Approximately 889.0 g/mol
AMINO ACID SEQUENCE	Ac-LKKTETQ (Ac-Leu-Lys-Lys-Thr-Glu-Thr-Gln-OH, 7 residues)
SOURCE	Synthetic (solid-phase peptide synthesis)

PHYSICAL PROPERTIES

APPEARANCE	Lyophilized white to off-white powder
PURITY SPECIFICATION	>=98% by HPLC (confirm against batch COA)
CONTAINER	10 mg per vial, sealed glass vial, rubber-stoppered, aluminum crimp

STORAGE & HANDLING

UNRECONSTITUTED STORAGE	-20 C, protect from light and moisture
RECONSTITUTED STORAGE	2-8 C, use within approximately 28 days
SUGGESTED RECONSTITUTION SOLVENT	Bacteriostatic water or sterile water (research use only)
SHELF LIFE (UNRECONSTITUTED, SEALED)	24 months at -20 C
STABILITY NOTES	Avoid repeated freeze-thaw cycles. Protect reconstituted solution from light.

STRUCTURAL NOTES

This is the acetylated central heptapeptide of thymosin beta-4, spanning residues 17-23 of the 43-residue parent protein and corresponding to the actin-binding motif. At roughly 889 Da it is about one-sixth the mass of full-length thymosin beta-4, and it is a distinct material from the full-length peptide sold separately as TB-500 — the two should not be used interchangeably in a protocol.

COMPLIANCE DISCLAIMER

This product is sold by Aligned Aminos for laboratory research use only (RUO). It is not a drug, dietary supplement, food, cosmetic, or medical device. It has not been approved by the FDA for any therapeutic, diagnostic, or preventative use. It is not intended for use in humans or animals, and may not be administered, ingested, applied, or otherwise introduced into any living organism. Purchasers represent that they are qualified researchers or laboratory professionals and assume full responsibility for compliance with all applicable laws and institutional review requirements governing the handling of research chemicals.

Batch-specific identity and purity are documented in the Certificate of Analysis (COA) issued for the lot.
